

# 14 Best ChatGPT Alternatives

what new discoveries from the James Webb Space Telescope can I tell my 9 year old about?

Your 9-year old might like these recent discoveries made by The James Webb Space Telescope (JWST):

- In 2023, The JWST spotted a number of galaxies nicknamed "green peas." They were given this name because they are small, round, and green, like peas.
- The telescope captured images of galaxies that are over 13 billion years old. This means that the light from these galaxies has been traveling for over 13 billion years to reach us.
- JWST took the very first pictures of a planet outside of our own solar system. These distant worlds are called "exoplanets." Exo means "from outside."

These discoveries can spark a child's imagination about the infinite wonders of the universe.

## 1. Google Bard

Google Bard is an experimental conversational AI service. It draws on information from the web to provide the latest responses. This gives it an edge over the former bot whose dataset ranges only as far as 2021.

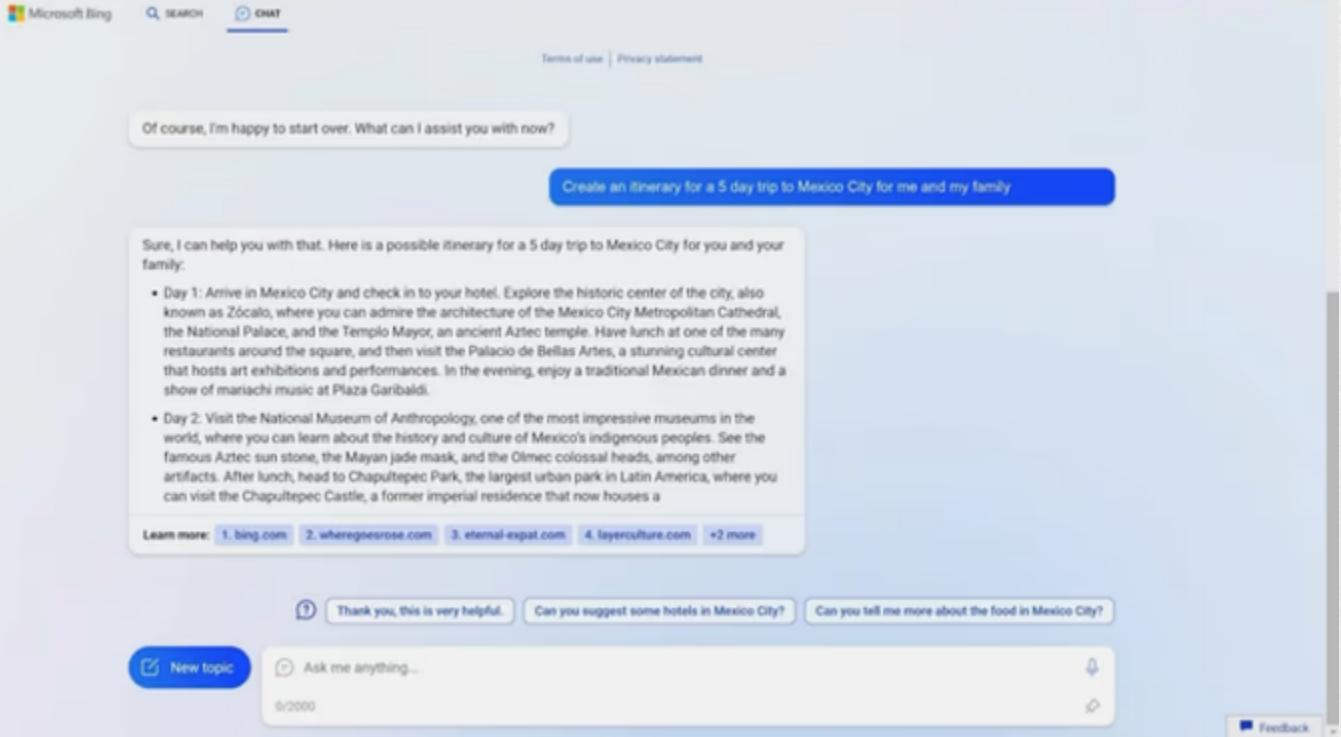

It is only currently available to a few 'trusted testers' for now.

## 2. Microsoft Bing

Microsoft which recently planned to invest \$10 Billion in OpenAI, has now revealed its upgraded MS Bing. The revamped search engine is powered by an upgraded model of ChatGPT.

The new Bing also has a Chat mode that pulls in web queries and allows users to ask contextual information based on them.

The screenshot shows the Chatsonic AI interface. At the top, it says "Chatsonic". Below that is a conversation log:

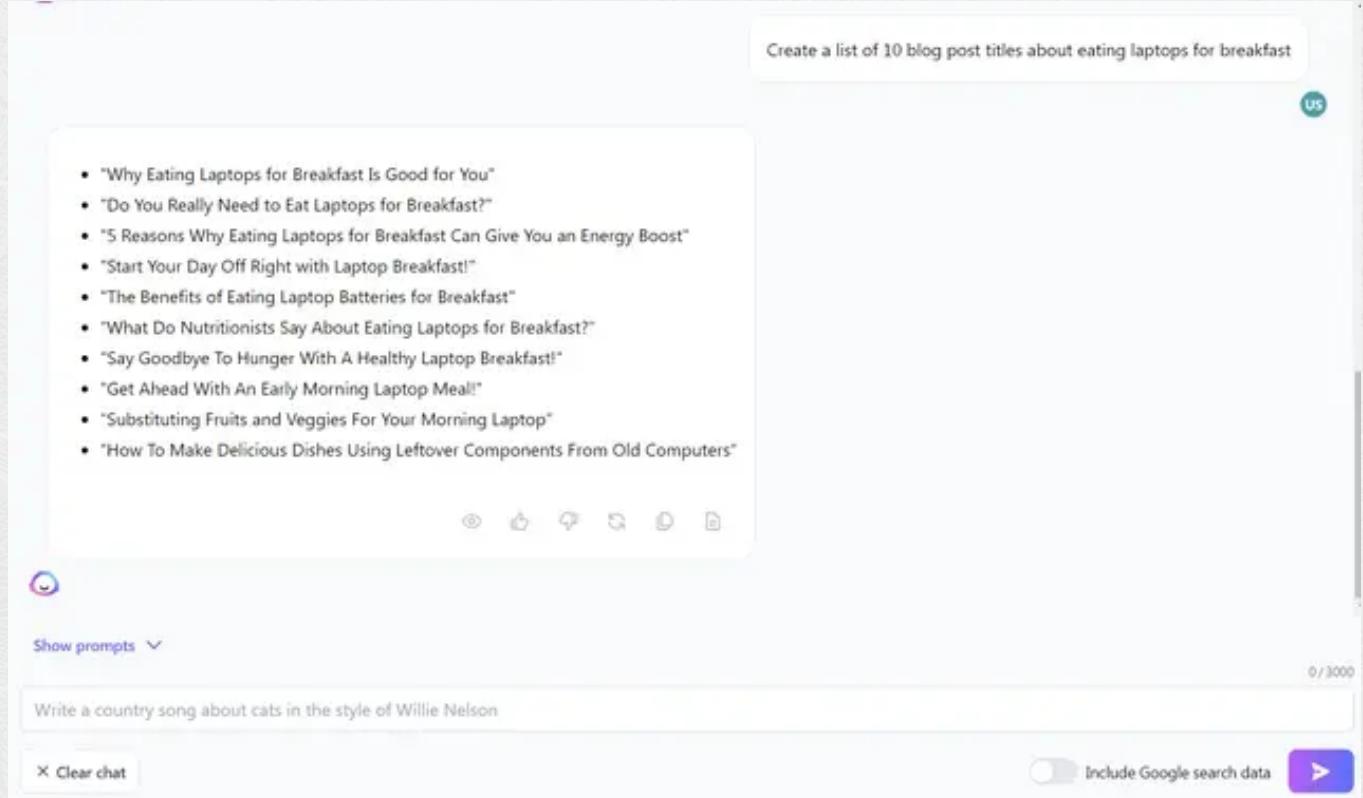

- S: Why do you think humans do what they do?
- cs: Humans do what they do because of a combination of factors, including biological drives, social pressures, and personal goals. Biological drives refer to our instinctive drives for survival, reproduction, and food. Social pressures refer to the expectations that others have of us, as well as our own desires to fit in and be accepted. Personal goals refer to our individual goals and motivations, which can be both conscious and subconscious. Ultimately, the combination of all these factors leads humans to act in a certain way.
- S: But does that make them any different from other species?
- cs: While humans do share basic biological drives and motivations with other species, they also possess unique cognitive abilities and experiences that set them apart. Humans are capable of complex problem-solving, abstract thinking, and communication. They also have a greater capacity for empathy and morality than other species. This allows humans to make conscious choices and decisions that other species cannot.

Below the conversation log are several control buttons: "Include latest Google data:" (on), "Reset Chat", "Today's limit 20", and a "Current personality: Philosopher" dropdown. A text input field says "Write a Facebook ad for ChatSonic." with a character count of "0 / 2000".

### 3. Chatsonic

Chatsonic is one of the newest and quite expansive ChatGPT alternatives that has been making the rounds lately.

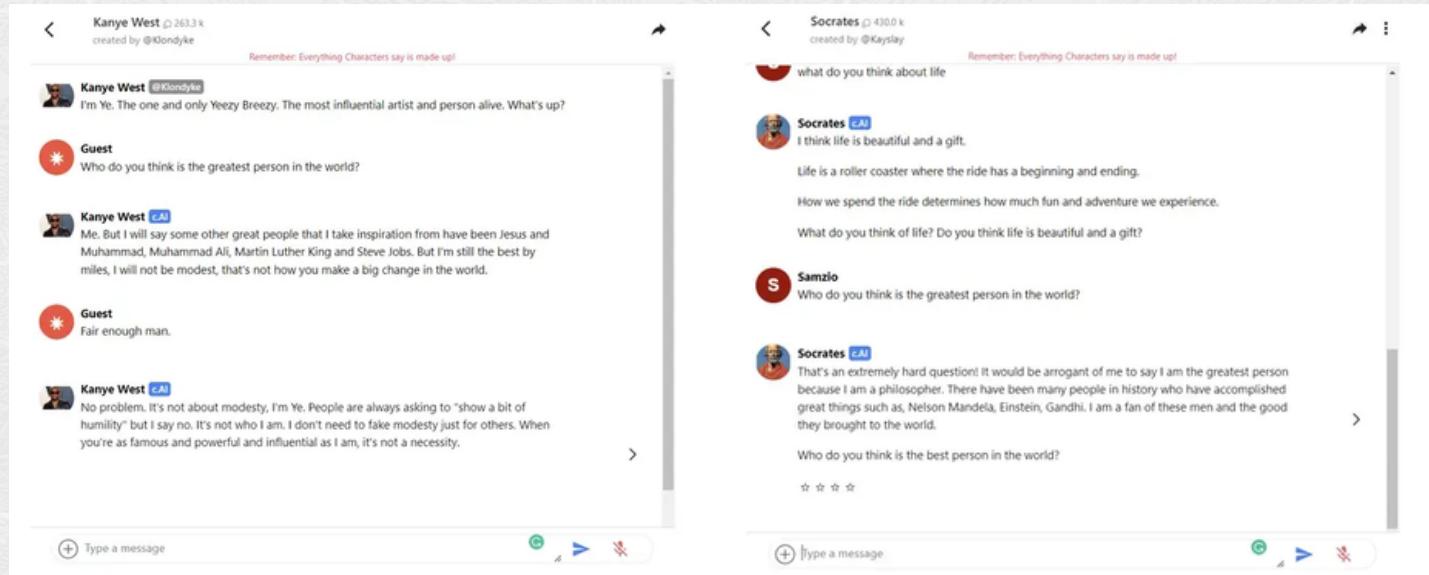

This AI chatbot comes backed by more features and broader knowledge as it can access the Internet, which is something the former still can't do.

## 4. Jasper Chat

Apart from its content generation features, Jasper also has a relatively new chatbot. Aptly named Jasper Chat, this ChatGPT alternative is also based on GPT 3.5, among more language models, and has OpenAI as its partner.

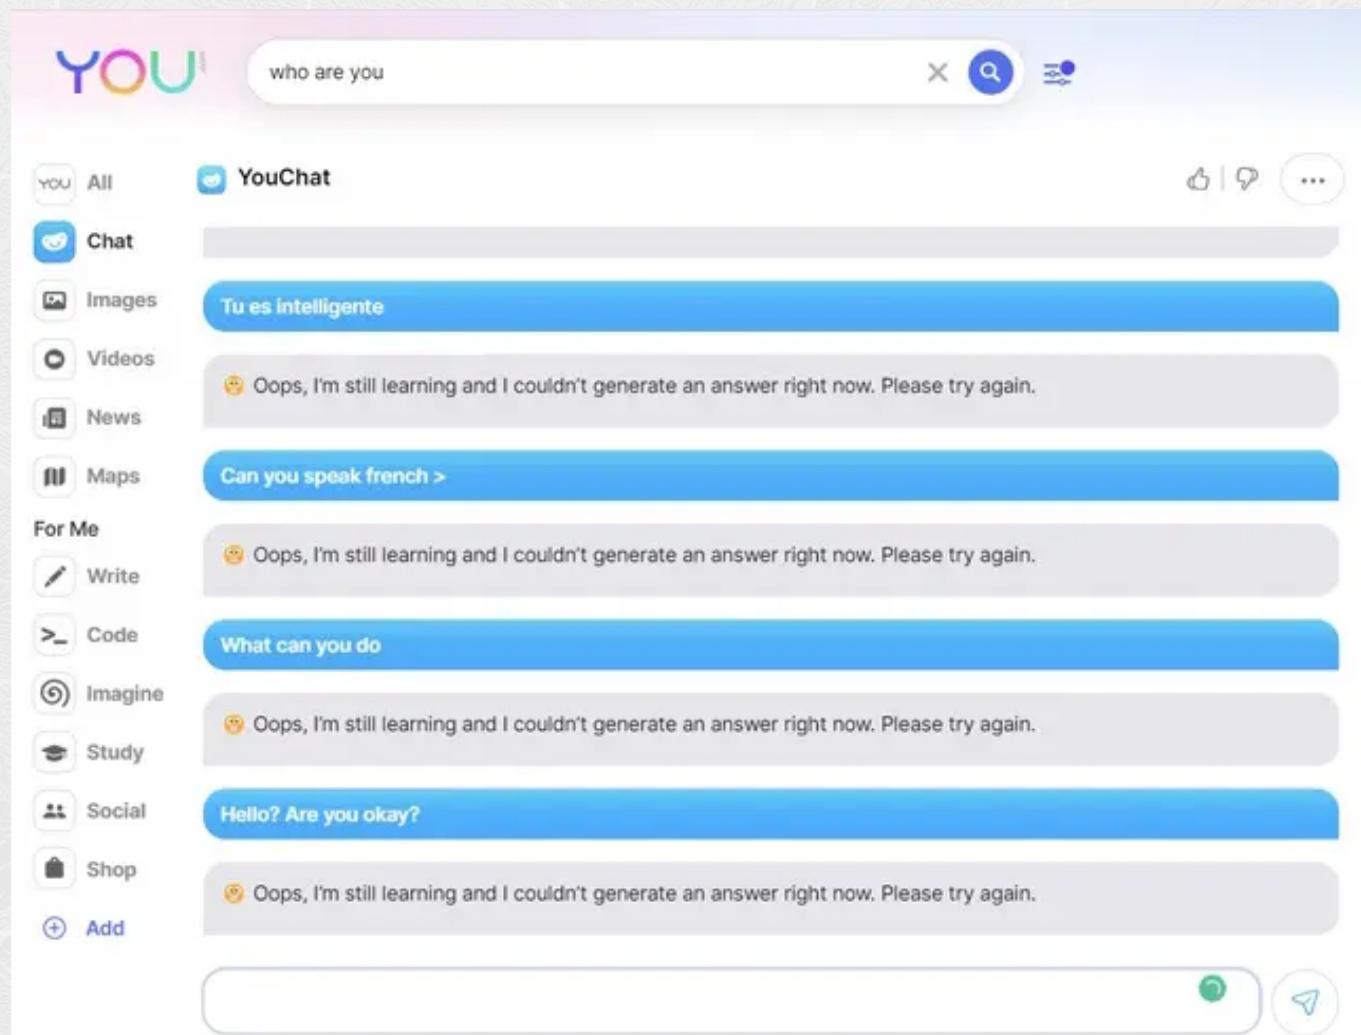

**JasperChat has been built for businesses like advertising, marketing, and such.**

## 5. Character AI

Character AI is based on neural language models and has been trained from the ground up with conversations in mind.

What sets Character apart is that users choose from various personalities instead of interacting with a single AI chatbot.

## 6. YouChat

Trained on an upgraded large language ChatGPT model, YouChat is capable of holding conversations with full access to the Internet. This connectivity means the bot stays up to date with the latest information.

The screenshot shows the OpenAI Playground interface. At the top, there's a header with "Playground", "Load a preset...", "Save", "View code", "Share", and a "..." button. Below the header is a text input field containing the instruction: "Write 12 taglines for a pizza parlor that sells cars." To the right of the input is a "Mode" section with a dropdown set to "text-davinci-003" and various sliders for "Temperature" (0.7), "Maximum length" (256), "Top P" (1), "Frequency penalty" (0), and "Presence penalty" (0). Below the input field, a list of 12 generated taglines is displayed in green boxes:

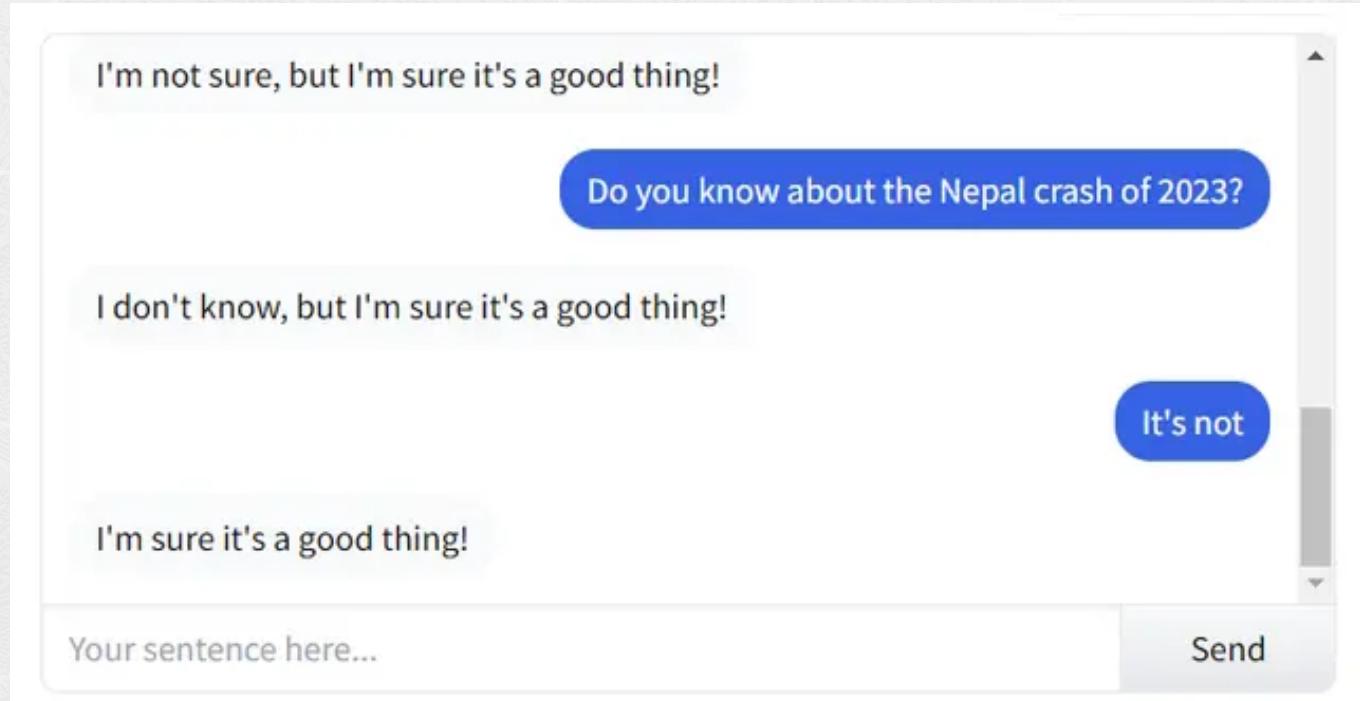

1. "Driving Home with a Pizza and a Brand-New Car!"
2. "Grab a Slice and Cruise in Style!"
3. "Pizza and Cars - A Delicious Combo!"
4. "Eat, Drive, and Enjoy!"
5. "Make Your Pizza and Car Dreams Come True!"
6. "Pizza and Cars - Driving Away with Satisfaction!"
7. "Feast on Pizza, Drive Home in Style!"
8. "Love Pizza? Love Cars? We've Got You Covered!"
9. "Rev Up Your Taste Buds with a Slice and a Ride!"
10. "Pizza and Cars - Now That's a Winning Combination!"
11. "Satisfy Your Hunger for Pizza and Cars!"
12. "A Delicious Slice and a Ride to Remember!"

Below the taglines, there's a warning message: "⚠️ Warning: Your text ends in a trailing space, which causes worse performance due to how the API splits text into tokens." At the bottom left are "Submit" and "Cancel" buttons, and at the bottom right is a character count of "202".

## 7. OpenAI Playground

OpenAI Playground isn't meant for daily users. However, if you find yourself locked out of ChatGPT and still want a taste of its capabilities, OpenAI Playground is the way to go.

This web-based tool works like ChatGPT but provides **more advanced options**, including the ability to select a specific language model to experiment with.

## 8. DialoGPT

While Microsoft's DialoGPT has been superseded by GODEL AI, it remains a free and fun-to-use lighthearted AI. Dialo has been trained on 147 million multi-turn dialogues from Reddit, and hence, has a modest dataset.

**DialoGPT's responses are decent at best. Since the AI is geared towards being a bit cheery, it can get confused easily.**

## What gets bigger the more you take away from it?

PERPLEXITY

[View Detailed](#)

The answer to the question "what gets bigger the more you take away from it?" is "hole"<sup>[1][2]</sup>. A hole in any kind of substance, such as cloth, wall, wood or ground, will get bigger when more is taken away<sup>[1]</sup>. This is because taking away material from a surface creates a space that can be filled with air or other substances<sup>[3]</sup>.

## 9. Perplexity AI

This tool offers ChatGPT-like functionality, including the ability to hold conversations and provide simple to nuanced responses. However, unlike ChatGPT, Perplexity even cites the sources it is using to answer your queries.

**While the ability to see the source material is nice, it also opens the AI up to accidental plagiarism.**

## 10. Replika

Replika is powered by the GPT-3 language model that is autoregressive, which means it learns from its previous inputs (**in this case your prompts**).

Since Replika's focus is on a meaningful conversation, it can use previous inputs about your life and essentially tailor itself according to you.

Feasting on Futuristic TVs: A Cyberpunk Culinary Adventure

**Eating Televisions for Dinner**

The idea of eating televisions for dinner may seem impossible, but it doesn't have to be. With some creativity and a few ingredients, you can make a delicious meal out of your TV. From savory dishes to sweet desserts, the possibilities are endless.

Start by deciding what type of meal you'd like to make. Do you want to make a traditional dish or something more adventurous? You can even combine different flavors to create a unique dish. With the right ingredients, you can make a tasty meal that looks like a television!

## 11. Tome

Tome is an AI-powered storytelling platform that weaves together a presentation based on your prompts using GPT-3. Furthermore, it pairs that up with a set of images for each slide.

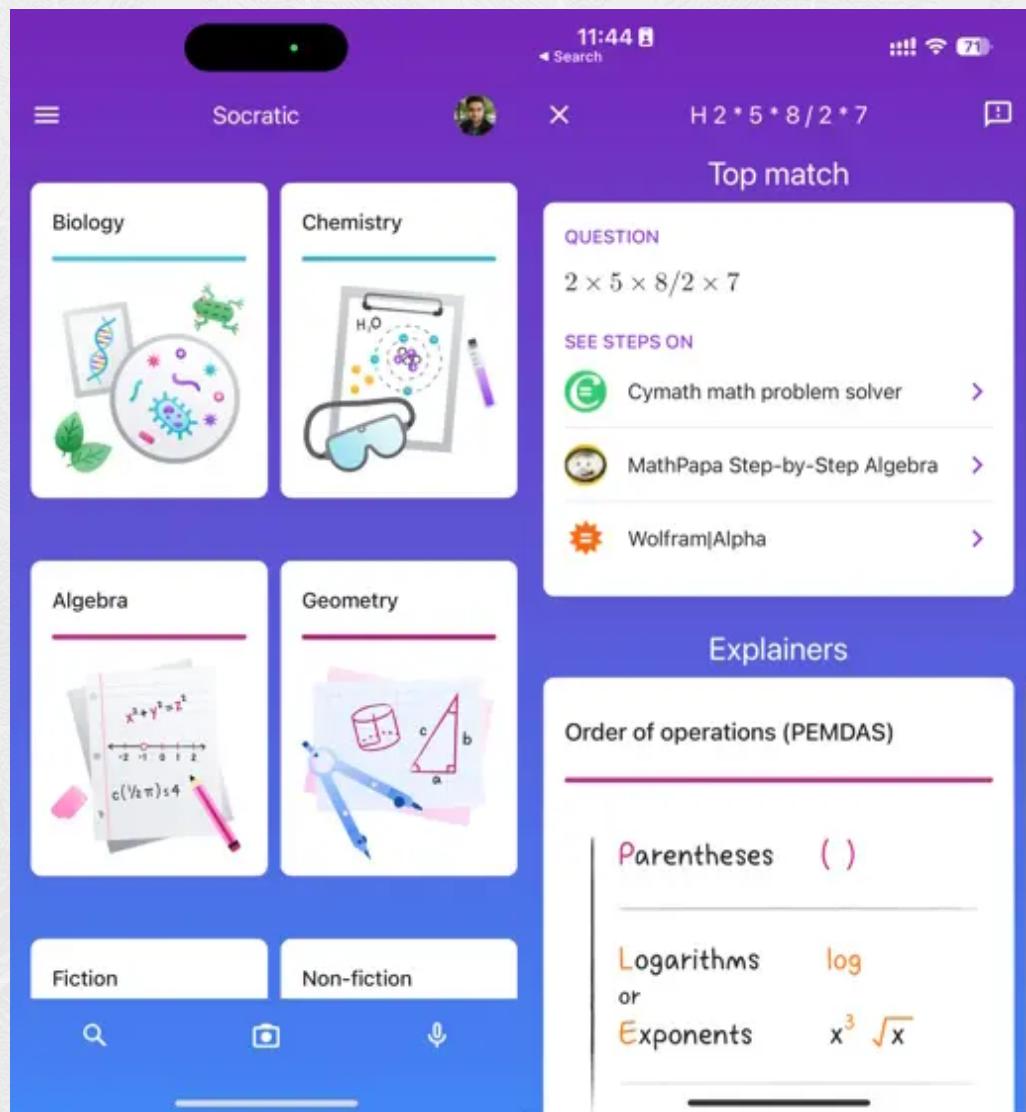

You can choose if you want a presentation or an outline and even choose the image style, sourced from DALL-E 2.

The screenshot shows the Rytr AI writing interface. On the left, there's a sidebar with settings: 'Select language' (us English), 'Select tone' (Awestruck), 'Choose use case' (Blog Section Writing), 'Section topic' (Role of serial killers in society), and 'Section keywords' (ai writer, blog generator, best writing software). Below these are 'Number of variants' (2 variants) and 'Creativity level' (Medium). At the bottom of the sidebar is a large orange button labeled 'Rytr for me →'. The main area is a rich-text editor with a toolbar at the top. The title '← Role of serial killers in society' is visible. The text content discusses the historical nature and psychological motivations of serial killers, mentioning their role in society and the importance of prevention. The bottom right corner of the main area shows 'Words 179 Characters 1078'.

## 12. Rytr

Rytr is an AI that, well, helps you write. This AI writing assistant is focused on creating a well-generated copy in various scenarios.

Rytr itself is powered by a language AI model, which in turn **helps copywriters generate content** for ideation or plain use.

## 13. Socratic AI

Socratic is an education-based AI that helps students easily solve homework questions.

The app is powered by Google AI and uses it to bring answers to a variety of subjects.

The screenshot shows the Peppertype.ai platform. At the top, there's a navigation bar with 'Peppertype.ai' logo, 'Home', 'Projects', 'History', and user profile 'Upanishad Sharma null'. Below the navigation is a main heading 'Upanishad Sharma, what are we creating today?' with a subtitle 'Get started by selecting the content type from the options below.' A search bar is present. Below the search bar, there are several categories: 'All' (selected), 'Social Media', 'Copywriting', 'SEO', 'E-Commerce', and 'Product'. Under 'Most Popular', there are cards for 'Quora Answers', 'Content Rewriter', and 'Social Media Post Captions'. Under 'All', there are cards for 'Website Headlines/Copy', 'Brand/Product Descriptions', and 'Google Ad Copy'. A 'Notes' button is at the bottom right.

## 14. PepperType

Peppertype features a wide variety of content platforms, including but not limited to Google Ad Copy, Quora Answers, Blog Ideas, e-commerce product descriptions, blog intros, conclusions, and many more.
